Team Phantom Tag Cloud Project Documentation: 27th Feb 2015
Author: Tim Allman

Tim Allman
Adam Stafford
Tuilla Chaves

The Team meeting was cancelled by Tim on Tuesday 24th as he was ill and could not make it in.

Tuilla is out sick with a fever so documentation falls to Tim.

Regarding documentation, this will be on a rotating basis: Going from Tim to Adam to Tuilla.

Next Meeting: Friday 6th March at 10.00am.

Adam has developed a basis for the project in Unity and has been working on functionality.
Tim was sick all week so has nothing done.
Tuilla is absent today due to illness.

Work for this week/weekend: Adam will push his code up to the team github account and then the other members can access it and start working on their own forks or branches.

Adam is going to continue working on the input text functionality and Tim is going to research and hopefully implement methods to upload a file/read a file in, to the program.

We also have a Team presentation due on Friday at 1pm on version control, so this means we will be working on that during the week and on Friday morning.
